About the presenter

Lacey Smith is a licensed genetic counselor in the Epilepsy Genetics Program at Boston Children's Hospital. She provides genetic counseling services to patients and families seen in the Epilepsy Genetics Clinical Consultation Program. In addition to her clinical work, she coordinates the Boston site of the PCDH19 Patient & Family Registry and is involved in a variety of collaborative research projects that aim to better understand the genetic contributions to epilepsy. Lacey is a member of EpiGC, which is an international network of genetic counselors who specialize in epilepsy genetics and who are dedicated to promoting access to quality genetics services for patients and families affected by epilepsy.
