and all other webinars that are of interest to you.
Please note that *advance registration is required for participation.*

Program Objectives:

At the conclusion of this program, participants will be able to:

- Identify the genetic nature of Familial Hypercholesterolemia (FH), including the causal genetic mutations
- Understand the pathophysiology of FH
- Recognize the typical and atypical features of the clinical presentation of FH
- Know the current systems to diagnose FH
- Discuss current treatment options for FH, including lipoprotein apheresis
